Company name: Winn Software Solutions
Company motto: "Winning with Winn: Software Solutions for Success"

Introduction:

Winn Software Solutions is a software development company that specialises in offering unique software solutions to companies of all sizes. Our goal is to assist each of our clients succeed by giving them the resources they require. Our engineers and developers put in countless hours to provide our customers with cutting-edge technology.

Services:

1. Web Development - we build high-performance web applications that are scalable, secure, and easy to maintain. We use HTML to provide the structure and content of a web page, its style and design are added by CSS. Moreover, we use JavaScript to create animations, dynamic effects, and user interfaces.

2. Mobile Application Development - we build mobile applications for cross platforms. Our developers have strong knowledge of Java or Kotlin programming languages, and experience working with Android SDK, Android Studio, and Android architecture components such as ViewModel for Android development.

3. Cloud Application Development - we provide scalable, flexible and cost-effective applications that can run on cloud platforms such as Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform.

4. Storage and Traffic monitoring - we ensure our clients that they have enough storage space to accommodate their website's or application's data, media files, and other resources. We help our clients identify trends in their traffic, such as peak usage times and popular content or pages, and optimise website or application accordingly.

Team:

<u>Umar Bhat</u> (TBM - technical business manager)

    <u>Network Security Solutions and Media Operations Engineer</u> with more than 4 years of working experience in IT sector. Worked with premium and SMB customers across the world. Worked on LAN, WAN, WLAN, VPN zone-based architectures and provided solution to complex issues. Also worked as Broadcast Media Engineer and provided RCA for complex streaming issues which included availability, latency and last mile issues. Engage with major streaming customers to provide end to end customer support from requirement gathering project execution, onboarding and event support.

<u>Baran Basaran</u> (Team Leader)

    <u>Full Stack Developer</u> with hands-on experience in HTML, CSS, JQuery, MongoDB, Node.js, and React.js. Worked as a backend developer on tasks such as API design, database design, unit testing and integration with frontend technologies. Has experience with client-side and server-side development using technologies such as creating responsive and visually appealing user interfaces.

Vladyslava Bondareva (CTO)

IOS Developer and Web Developer with work experience in HTML, CSS, SQL and database design, Swift and knowledge in UI/UX design. Created IOS mobile application using MVC architecture patterns and Swift. Has experience in building web applications using C#, MySQL and php.

Aditi Devdas Bhoir (Web designer)

Web Designer and Network Engineer with experience in working on Network Simulator version 2 on Ubuntu to create a FANET network of UAVs. Has knowledge of Java, Python, C, C++, HTML programming languages.

Lynn D'cunha (CRE - customer relationship executive)

An active member of the Winn software solutions with knowledge about various programming languages like HTML, CSS, C++, python. Worked on a project for OFS cargo wherein developed front-end skills.

Saljith Subash (Full Stack Developer)

 A highly talented Software Engineer who is passionate about design, integration, and solving problems. React JS, JavaScript, and SQL aficionados with experience converting business needs into technical solutions.

Timilehin Ayeni (QA Engineer)

A responsible and hardworking self-starter with a high sense of initiative and a vision to achieve the organisation goal and objective. Frontend Developer with experience in using React Library. Also, has experience with researching, investigating and fixing a wide range of technical issues and debugging and testing code.

📍 Dublin City

SUMMARY

Master's degree in Computing with a focus on software engineering and hands-on experience in HTML, CSS, JQuery, MongoDB, Node.js, and React.js. Strong collaborator, ability to work under pressure, and eager to learn new technologies.

EXPERIENCE

Backend Developer

InnoAdvisors

📅 02/2022 - 11/2022   📍 USA(Remote)

During my tenure at InnoAdvisors, a start-up company which runs NFT based card game, I was actively involved in backend development tasks such as API design, database design, unit testing and integration with frontend technologies. I used JavaScript, Node.js for backend development, MongoDB for database operations. I was responsible for designing and implementing the back-end infrastructure of the game and helped the company to make the game more stable and scalable.

Full Stack Developer

Bugbounter

📅 03/2021 - 12/2021   📍 Istanbul,Turkey

As a key member of a small team at Bugbounter, I was responsible for a variety of tasks, including client-side and server-side development using technologies such as Material Design, Bootstrap, HTML, and CSS for creating responsive and visually appealing user interfaces. I used JavaScript, jQuery, Node.js for backend development, database operations and integration with frontend, MongoDB as database technology and tools such as Jira, BitBucket and Git for project management and version control. Despite it being my first job experience, I was able to quickly learn and gain a lot of valuable experience in software development.

SKILLS

Backend

Node.js   Python   Kotlin

MongoDB   Selenium   Socket.IO

ORM   Docker   Database Design

API Design

Frontend

HTML   CSS   JQuery   JavaScript

Bootstrap   Material Design

Development/Tools

Test Driven Development   Jira

BitBucket   Git   Scrum

OBJECTIVE

Aim for a career in the field of Information Technology and computer Science by continuous learning and research.

EDUCATION

- **Griffith College Dublin,** Master in Science in Computing   (2022-2023)
- **University of Mumbai,** Bachelor of Engineering in Information Technology   (2017- 2020)
- **Pravin Patil College of Diploma Engineering and Technology,** Diploma in Information Technology

  (2014- 2017)

TRANNING AND INTERNSHIP

Company: CORIZO

Domain: Data Science and Machine Learning

Duration: 2 Months

PROJECTS

- **FANET USING NS2 (B.E FINAL YEAR PROJECT):**
  The Project was demonstrated on Ubuntu operating system. In project network simulation 2 software was used to create a FANET network of UAVs, also the AODV protocol was used to detect malicious UAV.

- **BLOOD BANK MANAGEMENT SYSTEM (DIPLOMA PROJECT):**
  Blood Bank management system website was designed with advance features using many web development programming languages.

- **AUTOMATIC PLANT WATERING SYSTEM:**
  It was IOT based project. Automatic Plant Watering System was demonstrated using Arduino, Moisture sensor and other IOT devices.

- **MNIST DIGIT CLASSIFICATION**
  The MNIST digit classification project is demonstrate using Python programming language, it's enabled machines to recognize handwritten digits.

- **MUSIC GENRE CLASSIFICATION**
  This Project is based on machine learning. Project demonstrates automatically classification different musical genres from audio.

TECHNICAL QUALIFICATION

1. Knowledge of Java, Python, C, C++, HTML programming languages.
2. Knowledge of working on Network Simulator version2.
3. Knowledge of Microsoft Office, Adobe Photoshop and Flash

CERTIFICATIONS

1. Certification in Security Fundamentals (Microsoft Certificate) by Microsoft Technology Associate.
2. Certification in SEO - Must - Do – Steps hands on workshop on search engine organize by Suven Consultants And Technology pvt ltd.
3. Certification in Internet of Things hands on workshop organize by Robokart (ISO).
4. Certification in E-commerce website designing using Wordpress Things hands on workshop organize by Robokart (ISO).
5. Certification in Graphics and web designing from Universal IT computer Education.
6. Certification in Stationary Designer from Universal IT computer Education.

TIMILEHIN AYENI

I am a self-starter with a high sense of initiative who is prepared to carry out my responsibilities with little to no surpervision. I am also highly motivated, dedicated, and capable of working under pressure. I am responsible and hardworking with a vision to achieve the organization goal and objective.
